Michel Rouly 37.8N, 122.4W **web** michel.rouly.net **github** jrouly **gpg** 0x1DFE3B2C

Skills

languages scala, python, typescript, javascript, java
data sql, dagster, postgres, elasticsearch, redis
devops aws, kubernetes, docker, terraform, helm, cdk, prometheus, grafana
etc bash, git, sbt, npm, gpg, openapi, grpc

Work

Zephyr AI {python, machine learning, infrastructure} zephyrai.bio
Software Architect **04/2021 - present**

- Owned architecture and delivery of unified data and AI platform, enabling secure, hybrid-cloud data and AI pipelines, and accelerating delivery of new models and data sources.
- Set technical direction for platform evolution, aligning technical strategy with long-term scalability, cloud portability, and organizational constraints.
- Drove cross-functional alignment across engineering, data, science, and external stakeholders, translating ambiguous requirements into architectural decisions while balancing research velocity with production rigor.
- Established data governance and quality standards, reducing compliance risk while enabling active cross-functional external collaboration.
- Identified and influenced cost and efficiency improvements at platform scale, including storage and compute hardware optimization strategies and data format standardization, improving long-term platform reliability and reducing cloud spend.
- Coordinated data and technical governance strategies within a highly regulated space.

Rally Health {scala, microservices, infrastructure} rallyhealth.com
Principal Software Engineer **11/2019 - 04/2021**
Senior Software Engineer **09/2016 - 11/2019**
Software Engineer **09/2015 - 09/2016**

- Architected and developed greenfield user facing microservice based applications.
- Managed production deploys, served on-call rotations, supported 24/7 live site.
- Designed and optimized ETL pipelines using Akka Streams, accelerating data ingestion velocity and increasing data quality standards.
- Built internal developer tooling including sbt plugins, focusing on automation.
- Instrumented performance and live site monitoring metrics with Datadog, increasing observability and reducing application downtime.
- Implemented security engineering goals with a focus on user privacy; hardened applications against known and anticipated abuse cases.

George Mason University {python, django, open source} honorscollege.gmu.edu
Lead Project Developer **08/2013 - 01/2015**

- Designed and built a collaborative research tool in Python with Django.
- Maintained multiple Linux servers hosting online content.

Harmonia {java, machine learning} harmonia.com
Programming Consultant **06/2012 - 06/2013**

- Created components of a learning classifier engine.
- Designed and implemented complex graphical user interfaces.

Education

M.S. Computer Science, Georgia Institute of Technology **01/2017 - 12/2018**
B.S. Computer Science, George Mason University, *summa cum laude* **08/2011 - 06/2015**

Publications

2015 ACM doi.org/10.1145/2787622.2787723
2014 IEEE doi.org/10.1109/IC2E.2014.42
